Two people are recommended for ease of assembly. Before you begin, remember to always work safely and follow tool manufacturers' safety instructions.

Notes:

- TRINITY storage tracks are designed to install over studs and properly studded drywall. For other surfaces please consult a local professional.
- To support claimed weight capacity:
 - Wall studs must be maximum 16" apart.
 - Each track section must be mounted on at least 2 studs.

INSTALLATION OPTIONS

Install 2 track sections side by side

Install 2 track sections into (2) separate storage tracks

Note: Plan out your storage track layout before proceeding.

TRACK SECTION INSTALLATION

STEP 1

Pick location and coverage you want prior to installing your track sections. If studs are covered by drywall, use a stud finder to mark locations of studs. Using a stud finder, locate all studs between start and finish, and mark along their length with a level. You will need to screw each track section into each stud.

Stud Finder

Level

Make a level line at bottom of your desired location for track section.

STEP 2

Make sure TRACK SECTION (A) has correct side up.

Place first TRACK SECTION (A) to wall, making sure bottom of TRACK SECTION (A) is flush with level line marked in step 1.

A (2)

C (8)

Drill

Secure TRACK SECTION (A) to wall by driving (4) SCREWS (C) through channels on front face of track section, directly into center of every wall stud as shown.

Repeat to install second TRACK SECTION (A).

TRACK SECTION INSTALLATION

STEP 3

Place END CAP (B) onto both ends of your installed track section by inserting ribs of END CAP (B) into channels of track section until you hear a click.

B (4)

HOOK USAGE

HOOK INSTALLATION

Place each HOOK (D/E/F/G/H) onto track section by inserting top edge of hook into channel of track section and then pushing bottom locking portion in until you hear a click.

Make sure HOOK (D/E/F/G/H) is secured to track section tightly before hanging anything on it.

HOOK REMOVAL

You can remove HOOK (D/E/F/G/H) from track section by first pressing down black locking tab on hook then pulling out bottom of hook before disengaging entire HOOK (D/E/F/G/H).
